**The World Premiere  
the first jewelry in the world made of space gold  
at Dubai International Jewellery Week**

In Dubai everything is possible... even the space jewelry. One lucky couple just won the set of Space Wedding Rings valued at \$17,000 in a Raffle Draw during the Dubai International Jewellery Week which took place on 10-13 November in Dubai. The Grand Prize was also the world's premiere **the first jewelry in the world made of space gold**. It was launched during the Dubai International Jewellery Week by SpaceWed company. The rings are made of gold flown in space. If already married or not interested in wedding bands, customers could choose one of the Space Rings also made of space gold.

***We had a great response here in Dubai. As we expected, people appreciate the unique products. – said Anna W. Puto, CEO of SpaceWed - and surprisingly there was a great interest among investors and collectors in our gold coins which travelled in space. There was also one client who decided to make a pendant out of this pure gold coin.***

SpaceWed, being the only company in the world offering space jewelry aims at providing an experience that is truly out of this world and the products which are the answer to the unique desires of the most demanding customers. Space Rings and Wedding Rings are created to combine rare and unattainable material, luxury, innovative concept and exquisite design which can be customized for the client upon request.

Space Rings and Wedding Rings offered by SpaceWed are made of gold which was sent in outer space in a suborbital sounding rocket on May 20, 2011. There is a limited edition of space jewelry available in 2011 named The 50th Anniversary Collection as it has been made in commemoration of the 50th anniversary of human space flight (12.04.1961) and was created as a tribute to mankind's achievement in the field of space exploration. It has been 50 years since Yuri Gagarin became the first person to journey into outer space, permanently shattering the definition of the word impossible.

**Space Jewelry - 50th Anniversary Collection limited edition!**

Each ring and wedding ring of the 50th Anniversary Collection is assigned a unique serial number, to be chosen by the client when ordering. This number will be engraved on the inside of the ring, along with the SpaceWed logo. The rings are sold in a custom designed Space Capsule and include a Certificate of Space Flight, as well as documentation of the rocket launch on a USB pendrive.
