

In Jewellery industry, “**FISCHER**” name is synonymous with high quality standards and highest precision for delivering EDXRF machines for fast, precise and accurate analysis of gold, silver and other precious metals and coating thickness measurements on gold alloys.

We deliver internationally proven high quality products and services which help to augment and enhance the quality, productivity and reliability of our customer's end product or services. Fischer India is the only company in India in this field having direct operations, thus securing the investment of its customers as the company is directly responsible for sale of machines, spares and after sales service.

Our products stand for high quality standards and highest precision. All our products are manufactured at state of the art facility in Sindelfingen, Germany. We are also leaders in customer service and enjoy high customer loyalty.

Fischer Measurement Technologies (India) Pvt. Ltd. was incorporated in India in April 2006 with its H.O at Pune and today FISCHER instruments are used successfully in the field of Jewellery Manufacturing, Hallmarking, Assaying and Jewellery Retail Stores all across India.

Fischer India offers its customers the global advantage of its parent company with local expertise. We are the most experienced leader in this field as it has more than 50 years of competency and knowledge built since its inception in 1953.
